

ABOUT ME

Adaptable Network Computing graduate ready to support a wide range of IT roles. Proven technical skills through a Final Year Project that used machine learning to detect system errors and restore servers automatically. Combines hands-on technical abilities in network setup with practical experience in on-site troubleshooting and client support. I have a strong drive to explore emerging technology, work hands-on with new devices, and master new skills fast. I am looking forward to bringing my passion and problem-solving mindset to a growing IT team.
